

Summary of Efficacy: STERIHOOD

Hard surface disinfection test of Salmonella bacteria using a modified EPA test protocol

January 2015

Bioscience Labs

ATCC #10708 Salmonella enterica

Demonstrates efficacy in 5 minutes

**Hard surface disinfection test of Feline calicivirus-a surrogate for human Norovirus
Using a modified EPA test protocol**

May 2015

Bioscience Labs

ATCC#VR-782 Feline calicivirus

Demonstrates efficacy in 5 minutes

Quantitative carrier test of Clostridium difficile using a modified EPA test protocol

January 2015

Bioscience Labs

ATCC#43598 Clostridium difficile

Demonstrates efficacy in 5 minutes of a 3.4 log reduction

ASTM E2315 modified EPA testing of MRSA on actual keyboards

January 2013

EMSL laboratories

ATCC #43300 Methicillin-resistant Staphylococcus aureus

In-vivo testing demonstrates efficacy in 5 minutes of a 3.64 log reduction

ASTM E2315 modified EPA testing of E. coli on actual keyboards

January 2013

EMSL laboratories

ATCC #25922 Escherichia coli

In-vivo testing demonstrates efficacy in 5 minutes of a >6 log reduction
