

Effectively Disinfect Handheld Devices in Minutes with **SteriBox** from **SteriDesign**

SteriDesign is in the business of creating simple, cost effective product solutions which disinfect pathogens commonly found on multiple user device surfaces in healthcare facilities, educational environments, hospitality and corporate settings.

All **SteriDesign** products are designed to be "environmentally friendly" using energy saving, low power, efficient designs. The safe and effective ultraviolet light that SteriDesign uses attacks the organisms cell wall and renders them unable to replicate.

SteriDesign products are independently US Laboratory tested and verified to be effective against MRSA, C. difficile, E. coli, and other pathogens.

Available in different colors!
500 piece minimum order
required per color.
